	Eagle 21:43 7/9/2002	Tbh, i thought omg! had a chance of winning, if they practiced. I dont think they have.

		[Comment: Report IP: Logged]
Dr_Evil^ 22:00 7/9/2002	Long story short by pressing the buy full armor button (buyscrpit) on the join team prompt you can end up floating around the spec cams (works in latest version of CS). A player did this and was promptly HSeD by someone facing away from him. Draw your own conclusions...	[Comment: Report IP: Logged]
Fmc 22:09 7/9/2002	hahaha, pld NS!!! We lost against Noc cos Scara made an awful smell while we were playing (put us off our game) :P :P :P	[Comment: Report IP: Logged]

	ryano theb0g 14:27 8/9/2002	The worst part is it will probably end up being a final where i-es lose about 3 rounds making the final not very final like if you know what I mean.	

		Saying that I got this funny feeling one might pull something out the bag, they ain't been playing their best online recently and I never expected them to beat noc. So obviously somethings going right there. [Comment: Report IP: Logged]	
	Ben- 14:29 8/9/2002	Can't believe iLLu, 'some' members from their clan were telling me they have a good chance to win GODC, and would give I-eS a good game. They mutsa really beleived themsleves! iLLu have lost cos tbh, they have about as much experience on LAN as my grandma. [Comment: Report IP: Logged]

	iron 14:35 8/9/2002	lol Ben? why is it people think you need 'LAN experiance' to perform the same as you do on the internet? [Comment: Report IP: Logged]
	r0ss 14:36 8/9/2002	omg! couldnt give I-es a decent game yesterday as Sarge and myself couldnt get our pcs fixed for mouse accel/wobbles etc etc. They pld really well and w/o a fix for our mice we got kinda boned 🤖:) i reckon in eyes HLTV of us v them from myself and clint would be the funnies. [Comment: Report IP: Logged]
	Ben- 14:37 8/9/2002	Oh so iron... i forgot there is NO different WHATSOEVER.... Like enforced configs, and the fact your sitting with your team, not speaking over CS : or Teamspeak... Oh and the ping difference... Oh and the fact that everyone is on the SAME machine with the SAME config might have something to do with it?? Please correct me if im wrong. [Comment: Report IP: Logged]
	shads theb0g 14:37 8/9/2002	you don't need lan experience, but you do need to be used to using other computers, desk/chair heights can be off putting too, maybe getting used to different fps, and mouse accel seeing as they're using XP now but for illu they just need to get used to getting the s*** beaten out of them on lan seeing as other people can register on them properly for once. [Comment: Report IP: Logged]

r0ss 14:39 8/9/2002	sin and mig pld well apparently [Comment: Report IP: Logged]
shads theb0g 14:40 8/9/2002	i don't think going from high to low ping makes any difference for playing on lan, because unless you're a configging w**k you should still be aiming at player models with high ping, so it's no different, unless your modem is REALLY f***ed up with loss etc so player models skip everywhere. all using enforced configs shouldn't make any difference surely, unless you like "advantages" over the net. [Comment: Report IP: Logged]
Ben- 14:40 8/9/2002	ROFMAO!!!! Im sorry but i couldnt find my logs, i think i formatted after him saying, but that's pretty much it :> N1 ripper [Comment: Report IP: Logged]

Ben- 15:25 8/9/2002		So why werent you in the server? [Comment: Report IP: Logged]
iron 15:29 8/9/2002		My sides are proper hurting from this post.. Firstly, Ben, what the f*** do you think the whole config paranoia is about? People giving themselves an advantage online by using different configs etc.. when at LAN you all have to use default/the same. NOt speaking over CS? You speak to each other more at LAN because youre sitting right next to each other. And shads you said about the xp s***, did any other teams have practice using xp mouse s***...no..if youre as amazing online as illu, you should at least be able to match youre online performance on LAN. Mig, dont you remember mag8? You used to use a3d..and theres no point even denying it, and watching some of ur avis and dling ur config from ur own webspace, u clearly use other stuff like gamma 9 even though it makes only a small difference...but it all adds up. And if none of you config, how do you explain the fact that youre half as good on LAN than you are online? [Comment: Report IP: Logged]
rd theb0g 15:30 8/9/2002		gaz is the best [Comment: Report IP: Logged]
shads theb0g 15:31 8/9/2002		iron, the only thing i said about XP was meant that it might be hard for people to get used to the different mouse sens, htf does that mean anything against anyone like you just said>? [Comment: Report IP: Logged]
Dr_Evil^ 15:31 8/9/2002		Hell Yeah! [Comment: Report IP: Logged]
iron 15:37 8/9/2002		when did i say it did? shads all i said was...illu should be as good on LAN as they are online, and the xp thing is the same for everyone.. [Comment: Report IP: Logged]
MiG- 15:37 8/9/2002		Mig, dont you remember mag8? You used to use a3d..and theres no point even denying it i never used a3d at all.. try using a3d with a tnt2 m64.. + the fact that a3d doesnt work with an sb !!ve value [Comment: Report IP: Logged]
shads theb0g 15:38 8/9/2002		iron, you make 0 sense, you take the p*** in your first post, then just agree with me in a followup ? [Comment: Report IP: Logged]
shads theb0g 15:39 8/9/2002		you can actually get a3d on sb live cards, but it takes a bit of f***ing around to get to work properly [Comment: Report IP: Logged]

Kimbler 15:39 8/9/2002	Wtf is all this config bulls*** talk..? The're isn't a single cvar that will make an average player a good player. Give it a rest please. Using a different desk/chair/OS makes the difference. It's not cfg, when you play on LAN your bullets have a tendency to hit people. [Comment: Report IP: Logged]
MiG- 15:39 8/9/2002	oh and iron, who said we played bad? we lost due to thae fact that N@s outplayed us gg.. ubj had mouse accel on, Xs couldnt move diagonally -- if he changed num lock then he couldnt move up or left.. handy that innit? [Comment: Report IP: Logged]
Stu^ 15:41 8/9/2002	MiG what a lie, the majority of illu cfg online. [Comment: Report IP: Logged]
rd theb0g 15:41 8/9/2002	they dont, alot of them r generally gud players [Comment: Report IP: Logged]
MiG- 15:42 8/9/2002	only with win98 shads.. ive been on XP for the last 1.5 years [Comment: Report IP: Logged]
Genics thed0n 15:43 8/9/2002	iron mig does not cfg, i have pld him online and i checked his cfg several times, was cpl..and he was still verry good. bit of a jammy c*** but n/m [Comment: Report IP: Logged]
Kimbler 15:43 8/9/2002	Please please explain what "configing" is.. I am dying to know, it seems to be such great advantage. List the variables please. [Comment: Report IP: Logged]
Jay429 15:44 8/9/2002	wow this is turning into a big new post, every1 wants a bit of the action :D [Comment: Report IP: Logged]
shads theb0g 15:45 8/9/2002	Kimbler, just ask erm about the BYCSL game against theb0g, first half i played i couldn't hit any of them at all, so i changed my rates to REALLY high for the second half, then i hit them fine and it took 4 times as many bullets to kill me... and that's not even touching any of the ex_ commands etc... [Comment: Report IP: Logged]
rd theb0g 15:45 8/9/2002	ye i want sum p***y [Comment: Report IP: Logged]
MiG- 15:46 8/9/2002	you mean on lan Genics ↵_↵ [Comment: Report IP: Logged]
Dino^ 15:46 8/9/2002	i think n@s deserves a bit of credit, instead of all this "omg illu cfg cheat BS" WP n@s ul illu [Comment: Report IP: Logged]
Kimbler 15:46 8/9/2002	playing with your rates is hardly "configing".. The problem is with s*** servers. Not people playing with their cfg's [Comment: Report IP: Logged]
rd theb0g 15:47 8/9/2002	i fink dan is the best, he solves evryfin [Comment: Report IP: Logged]
Genics thed0n 15:47 8/9/2002	yeh on lan. and he is good on lan. but i am better

		mwahaha [Comment: Report IP: Logged]
shads theb0g 15:47 8/9/2002	that's why i said without touching any of the ex commands...	but yes i would say purposely using bsly high rates is cfging anyway. [Comment: Report IP: Logged]
Genics thed0n 15:48 8/9/2002	kimbler that is bs, u dont know what ur talking about	[Comment: Report IP: Logged]
Stu^ 15:48 8/9/2002	So Roaddogg, you're just disagreeing with the large percentage of people that have played illu online and commented here about their configging, just because you're trying to get in their pants?	wp [Comment: Report IP: Logged]
rd theb0g 15:50 8/9/2002	fs, ive bin in there pants, there is fk all there. and yes i do disagree, i fink they r all gud players, and from wot i hear n@s r playin well and out played them. thank u goodnite lick my sack	[Comment: Report IP: Logged]
phonics 15:50 8/9/2002	If you cant beat them, take pride in others beating them for it of course wipes all prior s***ness off yourself and gives you the right to be hypocritical.	[Comment: Report IP: Logged]
Dino^ 15:50 8/9/2002	your a sad sad man	[Comment: Report IP: Logged]
dravicus 15:51 8/9/2002	can we leave this s*** on page 3 of comments and start a fresh by the time we get to page 4 plz? :x	[Comment: Report IP: Logged]
Dr_Evil^ 15:52 8/9/2002	IMO cfg online does very little. Interp can make an average player much better and I for one hope it gets locked to 0.1 in 1.6. The rest of the commands dont appear to do a lot from the way Vavle describe them mainly tweaking how to cope with packetloss etc. Having played vs iLLu online I can say that they are very very good but somehow I didnt expect them to perform at this LAN...	[Comment: Report IP: Logged]
iron 15:52 8/9/2002	no mig doesnt config at all > http://uk.internations.net/ironz0r/hax.zip Also mig, u have a geforce 3, which u got at christmas, at least thats what you told mag8, or was that bulls*** too?	[Comment: Report IP: Logged]
Negotiator Clan ONE 15:52 8/9/2002	gawn ONE, gawn obi	[Comment: Report IP: Logged]
Kimbler 15:52 8/9/2002	Quite the opposite Genics. I am in as good a position to comment as you. I am just sick and tired of all this cfg talk without anyone ever giving an example of what the _problem_ is. So please enlighten me or is it just urbanmyth.cfg	[Comment: Report IP: Logged]
Dino^ 15:54 8/9/2002	i think clan numbers are teh best	[Comment: Report IP: Logged]
MiG- 15:56 8/9/2002	http://uk.internations.net/ironz0r/hax.zip doesnt work and yes i did get a gf3 at christmas, having a gf3 doesnt change the fact that u cant use a3d emulators on winXP	[Comment: Report IP: Logged]

shads theb0g 15:57 8/9/2002	even tho i cba to get into this argument, it seems like ur just changing ur excuse as u see fit. and anyway dual booting? [Comment: Report IP: Logged]
iron 15:57 8/9/2002	i cant believe youre denying this? I remeber once me and you were on a server playing before a war and u were going thru some commands that i should 'try' one of them being s_a3d .. and one of them changing distances in which i can hear ppl or something? i cant really remember, i didnt even try ne of them. http://uk.internations.net/ironz0r/migcfg.zip < works. [Comment: Report IP: Logged]
iron 15:59 8/9/2002	Apart from the fact that you also werent on xp at christmas, you were on win98, i think you can ask any of the old mag8 members if you used to use a3d or not and every single one would say you did, i remember when we played prodigy, you were at electric door, whenever somebody was going to rush the hut, you could tell us, and when they were actually at the hut, you could tell us how many were going top of spawn and how many were going computer room, quite funny that you continue to deny this. [Comment: Report IP: Logged]
Negotiator Clan ONE 16:00 8/9/2002	thought this post was about gdoc? my bad [Comment: Report IP: Logged]
MiG- 16:02 8/9/2002	shoot da fook oop [Comment: Report IP: Logged]
Smittins 16:02 8/9/2002	"ubj does NOT config" sorry, but LOL [Comment: Report IP: Logged]
iron 16:04 8/9/2002	see all you can say now is stfu cuz u know what im saying is true and uve been revelead to an extent you can no longer cover up, and nego, this is about gdoc, its about why iLLu did so bad. [Comment: Report IP: Logged]
Epyon Kirby-eSports 16:06 8/9/2002	looks like illu couldn't produce the goods :/ wp n@s [Comment: Report IP: Logged]
MiG- 16:06 8/9/2002	maybe im stupid but i'm not following this argument.. i played well here, ask people at lan -- go f*** a dog? [Comment: Report IP: Logged]
Smittins 16:07 8/9/2002	hmm it seems like iLLu got shafted by the gdoc admins by only asking ies if they wanted a restart, then ignoring them anyway =/ [Comment: Report IP: Logged]

Iron you don't even play in a
clan do you? So why you
getting so worked up about
clan matters.

Also now its come to light I
remember calling mag 8 dodgy
f***s when you managed to
beat cf in the first match and
we all whinged and I'm sure
back then you all told us we
could fo and that you was all
default and no cheats etc. Aha

now I know the truth!

Also I think people use the word config and actually mean "this server is not actually good and my bullets aren't registering." Because at the end of the day I find same config will be different on every single server on the net, however on a lan its much much more consistent. So basicallyn when you say someones dodgy all it means is that by luck their connection/config is perfect for the server.

The only time you could accuse someone of configging would be if they scrolled through a variety of configs and practised to find which one not only suited their connection the ebst but gave them optimal performance. Problem is when you look at it like this you can justify condemning someone on the net who has bought better hardware. basically its all optimisation of the software and hardware

Mag8 part 2

dont even disgrace us by
comparing us to iLLu..
i know we werent one of the
most liked clans about but we
were better then illu,
and thats a god damn fact..
iLLu pld poo at LAN yes.. but
the first LAN mag8 went to we
lost to DNC(the winners).

it actually started raining on me
and iron cause of some cheap
roofing in the building..
it was so cold we couldnt even
feel our fingers..
and yes, i know DNC went
through the same thing but
there 10times better..
and we never went bragging
how we could come 1st/2nd at
the LAN like iLLu, we also never
got people to start posting
about how well we *would* do

Mag8 were quality at lanarena,
if you watch the demo on
aztec, you'll see me get owned
a whole lot at double doors.

As for iLLu, remember any
team can have a bad day, some
days you just lose to teams you
regularly rape in pcw, and lan is
no different to pcws.

CS is all mental and a poor
start or unlucky draw or such
can seriously damage a teams
confidence, confidence =
success... low confidence =
failure = less confidence =
more failure.. or something.

Maybe iLLu do just suck on lan
and config and chaet and hax0r
etc. online, but I know myself
that MiG and ubj are genuinly
good, honest, skilled players,
dunno the rest as well tho.

[Comment: Report | IP: Logged]

ryano

17:15 8/9/2002

yes I can explain his overflow,
he and his brother bluefish
were both netowrked to a pc
and due to some conflict
between his pc's hardware
think it was network card or
something there was an
overflow.

Don't know why you wanted to
know that.

Also, coco was accused along
with quite a few other big
names by blueyonder after
which they apologised to both
coco and the others for
releasing the list if you don't
remember. To be quite frank I
don't actually remember
anyone calling him a cheat, I
do however remember mag8
being known as dodgy online,
firsthand experience of the
matetr.

	iron 17:32 8/9/2002	deean mag8 beat cF everytime we played you, that doesnt mean we cheat or config? people didnt even care about 'configs' back then. What do you mean you know the 'truth'? i remember one time u and the whole cF team were convinced i was cheating and u asked me to send you a demo at the end of the match..which i did, and then you started apologising to me, and then you criticised us for slagging you down in team chat(about u accusing me of being 'dodgy') quite funny really. Like Culexus says, how can you even compare us to iLLu, at least we were as good on LAN as we were online, and thats alot more than i can say for the majority of clans these days. And as for dNC game, we never pretend we could, or even intended to beat them, infact at pizza hut before the game we said if we managed to get 9 rounds it would be a good performance, and maybe there are reasons why didnt play amazing? But theres no point in telling the people here cuz thats just making excuses in a game we were never going to win in the first place. Also	

deean, when did you ever play us at LAN? It really is funny because all the 'top teams' we had beaten online thought we were dodgy online, even though they hadnt even played us at LAN. Thats a nice logic to follow..

iron 18:00 8/9/2002	deean im not even gonna answer your question. You know, this is the problem with UK CS, im not gonna write a fancy column or use paragraphs. You have dickheads like deean and others who form oppinions on people because their good? Mag8 had a reputation for being dodgy online, and why was that? Because we were good, and we beat a few clans and they got a little upset. UK CS needs to support up and coming clans rather than give them a reputation they can NEVER shrug off, and now because of that reputation a clan that *could* of been one of the uks best, is now dead. Thanks alot to UK CS. [Comment: Report IP: Logged]

phonics 18:21 8/9/2002	and now while its hard enough for me to not completely slate any clan which adam (from illu obviously) plays for most of this criticism seems to be a couple of valid points (ok so 1 point which iron made) and the rest just people slating players which they know nothign about or criticising ilklu because they beat them online. Xs is undoubtadly a very good player , he is not new to good quality clans *just emerge and own everyone comment comes to mind* and infact the only person who hasnt played for a clan of similar level was getting some praise for playing well at the lan. BT have really pulled all the punches and this is easily the best thing next to CPL from wot it seemed. No problems with ping, good PC's, helpful admins really efficient. wanna say big up to noc for probably playing the most tense and enjoyable game of my time in cs. was 7-5 5-7. Then we went into 3x2 round overtime. They took the first 3 as CT and we took the other 3 as T. A knife fight was proposed but instead the money was split coz a game like that cannot possibly be decided with knives:/ wanna say wp to dsx,fly,ND,proc and landy who were all quality today(big up to ND, any doubts anyone had about him should of dissapeared after this lan). congrats to i-es the best clan in the uk by a long shot and comiserations to ONE who deserved to be 2nd best at the tourney, they pld very very well. 1st lan and we were a mess.

We have some young players and one or two were nervous about it. We have learnt alot about how lans r organised.

I dont know wtf happened to xs but in the 1st game, ubj couldnt disable mouse accel and xs couldnt run or move diagonally. i had a go at both of them afterwards for lettin the admins start when they wernt rdy.

Some players take awhile to get rdy and find it hard to adjust, i find it simple and pld the same as i do at home, nps for me.

I dont cfg and neither does xs, yea flame me now, but we r still here and will be at the next lan. MiG n ubj play lan regularly so u cant flame them, no1 accused me and adam did fine except he was a bit nervous and he was tryin to help xs.

so that leaves us with xs.

apparantly the default cfg was read only so xs couldnt change keys so the admin kept resettin his controls till he realised it was on read-only. this is why he was late to get in svr. and once he got on, it executing "dan.cfg" not sam.cfg.

We both live in london any 1 can watch us play with a cpl cfg.

At lan no1 called tacs and we sucked aassssss

just a word about the game vs ONE anyway.

both teams had about 10 minutes to setup as apposed to 30 in all the other games, which struck both teams quite bad.

i understand ONE had a few problems, as did some of noc including me.

we also had quite a few problems with the gui resetting binds which didn't help us much at all,

mouse drivers not loading, sensitivities not being the same as the day before etc

however ONE played better under the circumstances than us, but i'm dissapointed that we didn't have the chance to really play as well as we could have. we were all looking forward to this game, as we wanted to prove we could beat ONE on lan. yet again it hasn't happened

:(

if u watch the demo of this game u'll notice in the final round, a 2 vs 1, landshark tried to defuse the bomb, but the gui had reset his use key so he couldn't, so i had to try and defuse it from miles away :(

maybe if we had won that round we could have forced a tie, but thats in the past

well played to ONE, they were better than us in the circumstances

this meant we had to play i-es on train in the semi finals

we expected to do better than we did, altho we didn't really have any decent terrorist tactics to use. thats what happens when u don't practice hard enough =]

anyway i think if we had gone CT first, we could have got 7-9 rounds, so I think it would have been closer than the result states. also liquid cheated as CT :P

anyway i was happy with the lan apart from the time where we had 10 mins to setup due to things out of our control. was well organised, and was in the best building ever :D

hope they do another

oh and winxp is fine once ur used to it :D

Ben- 23:23 8/9/2002	Cul "Ben- 15:23, 8/9/2002 This is like Mag8 part 2 dont even disgrace us by comparing us to iLLu.. i know we werent one of the most liked clans about but we were better then illu, and thats a god damn fact.. iLLu pld poo at LAN yes.. but the first LAN mag8 went to we lost to DNC(the winners). it actually started raining on me and iron cause of some cheap roofing in the building.. it was so cold we couldnt even feel our fingers.. and yes, i know DNC went through the same thing but there 10times better.. and we never went bragging how we could come 1st/2nd at the LAN like iLLu, we also never got people to start posting about how well we <i>*would*</i> do" Well i have to agree, probably the only decent thing ive ever heard you say tbh. But pittty i wasnt discussing, i was just highlighting that all this s*** going on with iLLu is rumour based, like what happened with Mag8 [Comment: Report IP: Logged]
Ben- 23:30 8/9/2002	Ok.... If everyone just took a breathe of fresh air and would prepare for what your about to read, it would help. Everyone has the same console commands. This means that all your dodgy command like r_mmx and s_a3d and whatever people use, everyone has them.

WHAT is different is the value, the variable which is assigned when either your default, or have changed this. Most tend to be 0 or 1.

You can actually test this by typing all the command into your console whilst playing CS. It seems people have been deceived to think that just because the command don't appear in their config.cfg then its not there; well unfortunately for all you default folk, they are. So really, no one is default.

So my conclusion is that this is barely the tweaking of how your game looks/plays not "h4xing" or "configing" as some would put it.

If you really wanted to, you could find out every single Half-Life console command and type it into your config.cfg and make you be the biggest baddest config in da world! :/

If you don't like the fact that your internet opponent is better than you, and that you think hes "h4xing" then maybe you should tweak, or play on LAN?

Anyone who wants to play fairly can just download WWCL config enforcer from wwcl.net and install it. If your really THAT bothered.

Geez, can everyone please stop on the config arguing, its beginning to get very boring :/

	Ben- 23:55 8/9/2002	tbh im gonna copy my post into a notepad and paste it to anyone who ever says the word config or h4x again! [Comment: Report IP: Logged]	
	Genics thed0n 23:58 8/9/2002	ben ur theory is bs, if u type these commands into console and they aint in ur cfg it will just report its default value which is either 0 or 1. cfg haxing is where u change this default value by adding it to ur config and changing form 0 to 1. like s_a3d u can type in ur cosole and it will say 0. but if u add it to ur config set to 1 it enables it. just coz the console reports it doesnt mean it is doing anything. idiot [Comment: Report IP: Logged]	
	decrepit Croydon 00:14 9/9/2002	ben it really was an amazing post and all, cept all u really did was state firstly the obvious: "Everyone has the same console commands. WHAT is different is the value, the variable which is assinged when either your default, or have changed this. Most tend to be 0 or 1." I don't really know what happened with illu, all we were told is that XS was typing in the console, which no1 was supposed to have. Then they took him back to windows, reinstalled the default

config, and removed the console bit from the shortcut. Then apparently Horus saw XS with a piece of paper over his screen their, "tactics sheet" while he was typing. Horus thought this was suspicious, he had a look, and he had typed in exec sam.cfg or something, i dunno. So once again he was made to redo the default config.

At this stage the admins had said the game had started and there would be no restart, despite the fact we wanted 1 as well.

I dunno if that is the exact story or not, however that is what the main CS admin Horus said to us.

Yes Genics thankyou for reiterating what i said:

"WHAT is different is the value, the variable which is assinged when either your default, or have changed this. Most tend to be 0 or 1."

If you want to go into the finer details of why someone loading their config was wrong, the simple facts are:

At the time of this happening, all teams were told that they were not allowed to drop console for any reason.

The only command players were allowed to add to their config (under the shadow of an admin) was hud_fastswitch.

What makes a person think, 'I can't drop console, let me get an admin to add hud_fastswitch to my config, then I'll exec my config and hope he isn't looking'.

If Horus witnessed a player going against those rules, it seems more than fair to me for the game to go ahead without that player.. when in all rights the whole clan could have just been told to p*** off for abusing the rules laid out to each team at the event.

y dont u give illu a chance??? this was the 1st lan theyve played and not only have a young clan but serious f*** ups on their pcs.nothing bout cheatin or gettin used to xp or anything like that-that would b lame.xs is a v good player as most of u will know if-its nice to know that u all automatically assume it was cheatin when even the admin can tell u it wasnt.if hed been given a pc that actually worked that might have helped.and also the fact that 1 of their clan players left meant they couldnt finish which is not their faults only adams.

	[ONE]-BL 07:56 9/9/2002	ROFL BRETT i felt like crap all day on sunday cos i owned about 4 tripple cheese sandwiches. Bad news :D im finally home after a 7 hour train journey via Leeds, Manchester then Stoke. The event was superb and it was nice meeting all these online geezers irl. My first couple of games were terrible as the setup didnt feel right at all. The screen would shake when i bursted so i resorted to the good ol spray and pray. By the time we played OMG! on train i had a pc that had been tweaked (not by me) so it was nice and smooth thank god. A lot of ppl had little problems which were quite annoying and off putting. The match vs erm had to be restarted after the first couple of rounds (of 2nd half iirc) which must have peed them off!. Like how we felt when noc match was restarted >< On the first day the console was freely available and no cpl cfg was installed. I checked rates and it was like 30/20/9999. But fair play they fixed it the next day and CPL cfg was installed. I didnt really see what happened with the whole illu thing. I was sitting behind them talking to some RTCW guy and Xs and Sin started kicking up a fuss with Horus about the cfg/restarting thing. Should have been restarted imo! We seem to get owned a lot online but on lan it seems to be another story! Make of that what you will! Anyways GG to everyone had a cracking time! lil cheats

Skin can you not read? It was the admins that said he was trying to exec configs, and that he kept doing it repeatedly. Its not like he was caught once and they decided he couldnt play. Admin said he was caught, they redefaulted the config, and then he tried doing it again with paper over his screen to hide it.

The reason there's such a fuss about it, something like this has never happened in a uk lan, since default configs were introduced to lans last year.

Craig using a m8s comp btw :)

bout the illu stuff, i was busy playin vs n@s for omg at the time. XS was sat opposite me, from what i made out when he connected to the server in the console or sumthing there was like execing sams cfg in the console, think he had loaded his autoexec onto the comp or his cfg. So give illu as a clan a chance maybe but at the end of the day the guy was cheating, he had his cfg or auto exec on the computer, that doesnt happen by accident locked cfgs with no console and he has his cfg or autoexec on there, thats a f***in joke tbh, i feel sorry for MiG cos i know him irl an he is a good player on lan on default.

You could see by the way he was acting and tryin to cover it up that it was no accident, if sum1 has the cheek/stupidity to do that in a lan tourney then what they gonna get upto when they r at home???

	DArtagnan Infinity-eSports 17:06 9/9/2002	CFG can make a difference Dino, when you realise this then you'll stop making yourself look foolish. It was because of configs on lan that the CPL went to default. CPL London was a farse for the configging, cause it made a lot of players very hard to hit, and the game just wasn't fair. If 1 player uses a config, he can change a lot of netcode settings, meaning he would have a definite advantage. The whole point is, every1 has to use the same....the fact he's trying to load a script is against the rules. Therefore it was an attempt at cheating. [Comment: Report IP: Logged]	
	shads theb0g 17:35 9/9/2002	"face upto the truth"... what "truth" am i completely missing here in your bs world Ben? People might play cs for fun, but LAN competitions (specially ones with such a lot of prize money involved - ok it's not as huge as cpl etc but it's a big first prize for the UK.) are taken seriously by the majority of clans playing in them. If everyone is meant to use a default standard config, what makes XS so special that it's alright for him to load his own and give himself unfair advantages that = cheating Ben ? 	MiG- 21:23 9/9/2002	it still hasn't been proven that Xs installed his CFG. What Horus said was he _saw_ the console saying "execing Dan's Config," he did NOT say Sam... Until proof is actually given, please don't assume Xs installed his own config. As for the tactic sheet thing, we really did have tactic sheets, with coloured writing etc xD We didn't waste time and money to attend a LAN where we were going to attempt to cheat.
